# Chapter 1

## Quem sou eu

This is a *sample* book written in **Markdown**. You can use anything that Pandoc's Markdown supports, e.g., a math equation  $a^2 + b^2 = c^2$ .

The **bookdown** package can be installed from CRAN or Github:

```
install.packages("bookdown")  
# or the development version  
# devtools::install_github("rstudio/bookdown")
```

Remember each Rmd file contains one and only one chapter, and a chapter is defined by the first-level heading #.

To compile this example to PDF, you need XeLaTeX. You are recommended to install TinyTeX (which includes XeLaTeX): <https://yihui.org/tinytex/>.

## Chapter 2

# Introdução

You can label chapter and section titles using `{#label}` after them, e.g., we can reference Chapter 2. If you do not manually label them, there will be automatic labels anyway, e.g., Chapter ??.

Figures and tables with captions will be placed in `figure` and `table` environments, respectively.

```
par(mar = c(4, 4, .1, .1))
plot(pressure, type = 'b', pch = 19)
```

Reference a figure by its code chunk label with the `fig:` prefix, e.g., see Figure 2.1. Similarly, you can reference tables generated from `knitr::kable()`, e.g., see Table 2.1.

```
knitr::kable(
  head(iris, 20), caption = 'Here is a nice table!',
  booktabs = TRUE
)
```

You can write citations, too. For example, we are using the **bookdown** package (Xie, 2019) in this sample book, which was built on top of R Markdown and **knitr** (Xie, 2015).

## Chapter 3

# O que faz um cientista de dados?

e porque me tornar um?

Here is a review of existing methods.

## Chapter 4

# Iniciando com o R

We describe our methods in this chapter.

## Chapter 5

# Instalar Pacotes no R

Some *significant* applications are demonstrated in this chapter.

### 5.1 Example one

### 5.2 Example two

## Chapter 6

# Ler ou salvar dados com o R

We have finished a nice book.

## Chapter 7

# Manipulação de vetores, matrizes e listas

We have finished a nice book.

## Chapter 8

# Manipulação de dados com o dplyr

Some *significant* applications are demonstrated in this chapter.

### 8.1 Example one

### 8.2 Example two

## Chapter 9

# Manipulação de Hora e Data

We describe our methods in this chapter.

## Chapter 10

# Estruturas de Controle

We describe our methods in this chapter.

## Chapter 11

# Análise Exploratória

Some *significant* applications are demonstrated in this chapter.

### 11.1 Example one

### 11.2 Example two

## Chapter 12

# Gráficos

We have finished a nice book.
